Extremely long duration and long-lasting durability

Professional and efficient, with on-site guidance

Green and environmentally friendly, with bright lighting.

Improve the lighting environment for humans Developing the lighting industry in China

This is the ultimate goal that Xinyi Xin is determined to pursue.

ABOUT US

Jiangsu Xinyixin Lighting Technology Co., Ltd.

Established in 2012, it is located in the center of the Taihu Plain in the Yangtze River Delta region of China. It is the ancient and cultural city of Jiangnan - Changzhou, Jiangsu Province.

The company's registered capital is 20 million yuan.

It is a high-tech enterprise that integrates LED industrial lighting fixtures, independent research and development, large-scale production and manufacturing, as well as construction and installation services. It provides end customers with comprehensive lighting solutions. Up to now, it has formed an enterprise scale with a series of lighting fixtures and light sources, electrical products such as industrial engineering lighting, road and courtyard lighting, large-scale landscape lighting and commercial office lighting, with nearly a thousand varieties of products for organization production.

At present, the company has successfully obtained the certifications for the ISO9001, ISO14001 and OHSAS18001 management systems.

The processes of production, management and sales have been carried out in a documented manner; the LED industrial factory lighting series lamps independently developed and produced have passed the China National CCC compulsory product certification; the long-life, maintenance-free, high-efficiency and energy-saving series of high-pressure sodium lamps have an energy-saving rate of over 50%, and have received unanimous praise from customers.

Xinyi Xin has successively formed business and technical partnerships with international lighting brands such as Lumileds, Cree, and Taiwan's Mingwei.

Meanwhile, during the process of jointly conducting scientific research projects with them, the company established a professional lighting technology research and development center, cultivated talents, and strengthened its own technological reserves.
