

Lighting Series Lamps

Provide comprehensive lighting solutions

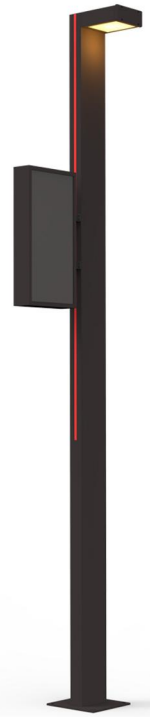

Commodity Display

LED garden lights

Luminous efficacy: 160 lumens per watt; The inspection port is equipped with a single-pole control switch (for convenient later maintenance); An ambient light strip is added to the side; The light source part is guaranteed for seven years. The lamp body is coated with ultrasonic electrostatic powder spray (imported powder from Aksu), which is corrosion-resistant and will not fade or show color difference for ten years.

Product Introduction.

Luminous efficacy: 160 lumens per watt; The inspection port is equipped with a single-pole control switch (for easy maintenance in the future); An ambient light strip is added to the side; The light source part is guaranteed for seven years.

All-aluminum formed lamp body (produced by national standard aluminum extrusion process), lamp body has a lifetime warranty (except for impacts); Total lamp weight: 35KG (made of all-aluminum material)

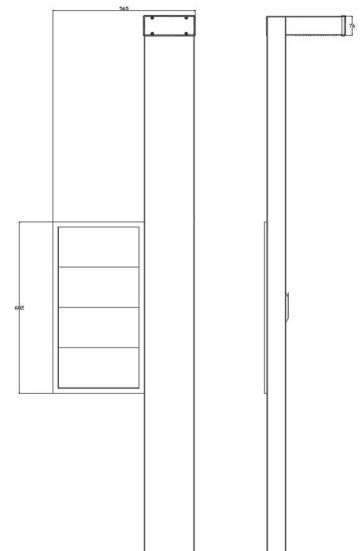

The lamp body is coated with ultrasonic electrostatic powder spray (imported powder from Aksu), which is corrosion-resistant and will not fade or show color difference for ten years.

Product size

Power	30w
Lighting effect	160Lm/W
Size	220*250*3000/3500mm
Weight	35kg
Protection level	IP65-IP66

Intelligent Configuration: Equipped with a 128*256 resolution intelligent dot matrix screen; Installed with exclusive software, it supports customized display of contents such as pictures, videos, text, clock, weather, and web pages.

Product Introduction.

40W mono solar panel

It is an efficient, energy-saving and environmentally friendly lighting device, and is widely used in various scenarios.

- Using imported chips, it features high brightness and high color rendering index, with stable performance, higher usage rate and greater energy saving.
- The lifespan is longer than that of traditional light sources, reducing the frequency of maintenance and replacement, and lowering the maintenance cost.
- The lamp body is made of high-quality steel, which has faster heat dissipation and greater durability, and does not contain harmful substances, conforming to the concept of green environmental protection.
- It can be fully charged in 5-12 hours and can also light up in rainy days.

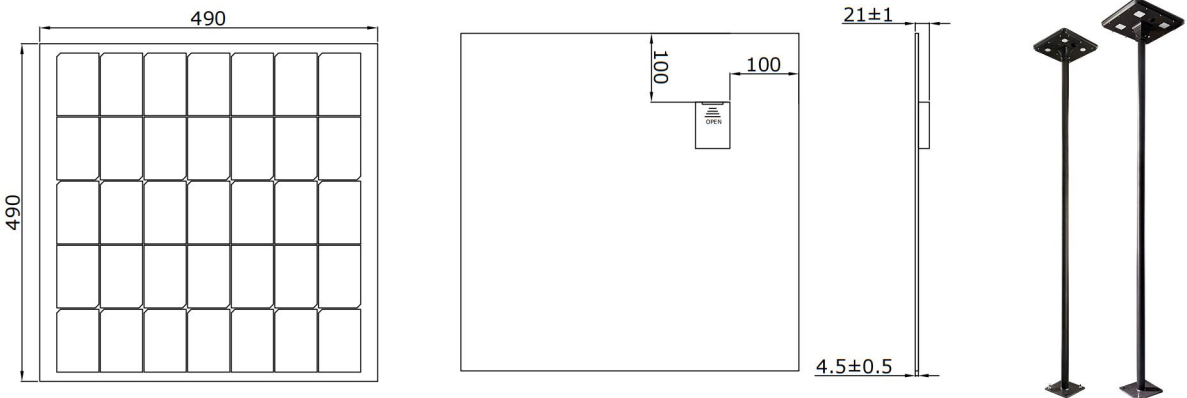

Energy conservation and environmental protection

High level of security

High reliability

Product parameters

Photovoltaic panel power	Light source power	Battery capacity	Weight	Size	Service life	Lighting effect
40W	60W	15Ah	24kg	503*503*3000mm	10-15years	160lm/W
60W	60W	15Ah	24kg	593*593*3000mm	10-15years	160lm/W

LED landscape lights

A garden lamp is a type of lighting fixture specifically designed for outdoor courtyards, gardens, community roads, etc. It usually combines functionality and decoration. Its core function is to provide night lighting, and through an attractive design, it enhances the environment atmosphere. Modern garden lamps mostly use LED light sources, featuring energy efficiency, long lifespan, and high brightness.

Product Introduction.

Luminous efficacy: 160 lumens per watt; The inspection port is equipped with a single-pole control switch (for convenient maintenance in the future); The light source part is guaranteed for seven years.

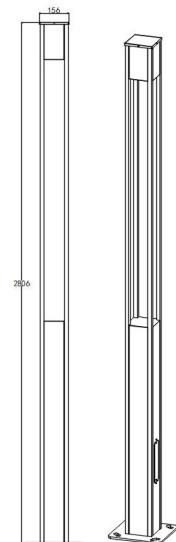

All-aluminum formed lamp body (standard aluminum extrusion process), lamp body has a lifetime warranty (except for impacts); total lamp weight: 21KG (all-aluminum material)

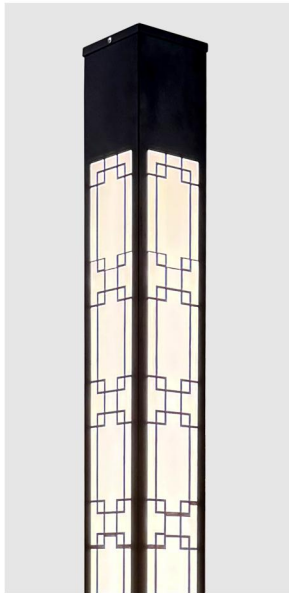

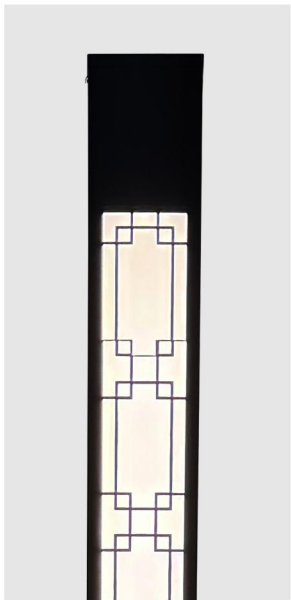

The lamp body is coated with ultrasonic electrostatic powder spray (imported powder from Aksu), which is corrosion-resistant and will not fade or show color difference for ten years.

Product size

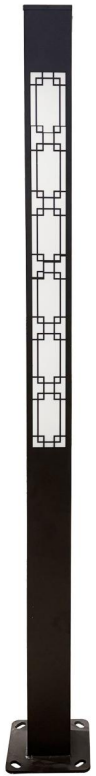

Power	30w
Light effect	160Lm/W
Size	156*156*2806mm (Highly customizable)
Weight	21kg
Protection level	IP65-IP66

New Chinese-style landscape lights

The new Chinese-style landscape lights are outdoor lamps that combine traditional Chinese elements with modern design. They possess both a classical charm and practicality, and are durable. They are particularly suitable for scenarios such as community gates, villa courtyards, and park walkways. The lamp body is sturdy and has excellent waterproof performance.

Product Introduction.

Highlight LED light source. The inspection port is equipped with a single-pole control switch (for convenient later maintenance); the light source part is guaranteed for five years.

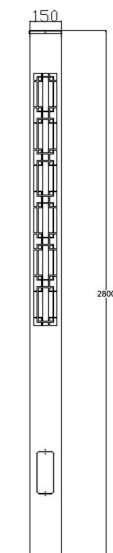

The lamp body is covered by a lifetime warranty (except for impacts); Total weight of the lamp: 22KG. Lamp body material: Zinc alloy + PC. Customizable laser engraved patterns are available.

The lamp body is coated with ultrasonic electrostatic powder spray (imported powder from Aksu), which is rainproof and lightning-proof, corrosion-resistant, and will not fade or show color difference for ten years.

Product size

Power	50w
Size	150*150*2800mm (Highly customizable)
Weight	22kg
Color temperature	3000K、4000K、5000K、6000K
Protection level	IP65-IP66

LED landscape lights

Product Introduction.

Highlight LED light source. The inspection port is equipped with a single-pole control switch (for convenient later maintenance); the light source part is guaranteed for five years.

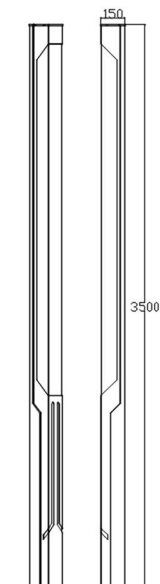

The lamp body is covered by a lifetime warranty (except for impacts); Total weight of the lamp: 25KG. Lamp body material: Zinc alloy + marble. Patterns can be customized.

The lamp body is coated with ultrasonic electrostatic powder spray (imported powder from Aksu), which is rainproof and lightning-proof, corrosion-resistant, and will not fade or show color difference for ten years.

Product size

Power	50w-100w
Size	150*150*3500mm (Highly customizable)
Weight	25kg
Color temperature	3000K、4000K、5000K、6000K
Protection level	IP65-IP66

Integrated solar lawn lamp

The LED solar lawn lamp is an outdoor decorative lamp that doesn't require wiring and automatically lights up at night after being exposed to sunlight during the day. It is mainly used to embellish gardens, parks or community green spaces, and is both energy-efficient and safe.

Product Introduction.

Using imported chips, it features high brightness and high color rendering index. It has stable performance, higher usage rate, and is powered by solar cells, thus being more energy-efficient.

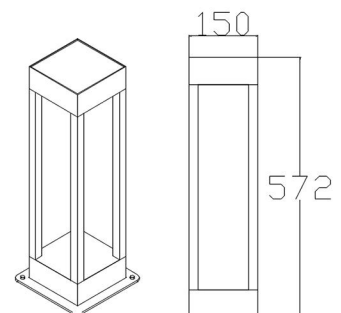

All-aluminum formed lamp body (produced by national standard aluminum extrusion process), lamp body comes with lifetime warranty (except for impact damage); water-resistant, rust-proof and sun-proof.

Excellent reflective performance. The light is clear and bright, resistant to wind and sun exposure. It can be used outdoors for 10 years.

Product size

Power	3w-5w
Size	150*150*572mm (Highly customizable)
Weight	2kg
Color temperature	3000K、4000K、5000K、6000K
Protection level	IP65-IP66

Solar-powered wall-mounted lamp

The LED solar lawn lamp is an outdoor decorative lamp that doesn't require wiring and automatically lights up at night after being exposed to sunlight during the day. It is mainly used to embellish gardens, parks or community green spaces, and is both energy-efficient and safe.

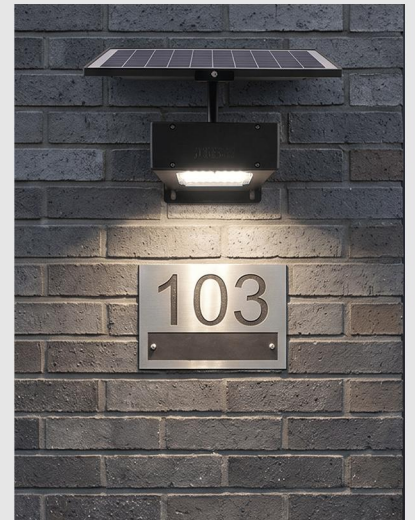

Product Introduction.

Using imported chips, it features high brightness and high color rendering index. It has stable performance, higher usage rate, and is equipped with a solar power supply design, which is both environmentally friendly and energy-saving.

The top is equipped with solar photovoltaic panels. The lamp body is made of all-aluminum and is produced by national standard aluminum extrusion technology. The lamp body is guaranteed for life (except for impact damage). The light source is guaranteed for five years.

It has an IP65 protection level, which is waterproof and dustproof, resistant to sun exposure, with excellent performance and suitable for outdoor installation.

Product size

Power	8-25W
Lighting effect	200*310mm
Size	2kg
Weight	3000K、4000K、5000K、6000K
Protection level	IP65-IP66
